CAREER OPPORTUNITIES

Group Human Resources would like to provide some job opportunities for individuals who would like to explore and express their hidden talents. In view of this, we would like to extend some job opportunities to all **SeliaGroup** staff who is interested and would like to explore and express their hidden talents.

We also welcome you to forward any resumes from external which are relevant to these positions:

No	Positions	Job Responsibilities	Job Requirements	Location
1	Junior Site Engineer (RSB)	1. Supervise and monitor daily construction activities to ensure all works are carried out according to approved drawings, specifications, construction methods, and project schedule. 2. Coordinate and oversee subcontractors, workers, suppliers, and site resources to ensure smooth site operations and timely completion of project activities. 3. Monitor road construction works including earthworks, excavation, filling, drainage works, subgrade preparation, pavement works, asphalt laying, kerb installation, and other related civil works. 4. Ensure all construction works comply with project quality requirements, approved materials, construction standards, and client specifications. 5. Conduct regular site inspections to identify defects, non-conformance issues, safety hazards, and ensure corrective actions are implemented promptly. 6. Maintain daily site records including site diary, manpower records, equipment usage, material deliveries, work progress, and site issues. 7. Monitor project progress against the approved work programme and highlight any delays, constraints, or potential risks affecting project completion. 8. Perform any other duties and responsibilities assigned by the Senior Project Manager or Management to ensure successful completion of the project.	1. Degree or Diploma in Civil Engineering, Construction Management, Building Technology, or equivalent qualification. 2. Minimum 3–5 years of working experience in civil engineering, infrastructure, or road construction projects. 3. Experienced in supervising road construction activities including earthworks, drainage, pavement, asphalt works, and infrastructure development. 4. Able to read and interpret construction drawings, technical specifications, method statements, and project work schedules. 5. Able to supervise subcontractors, monitor manpower productivity, and ensure works are completed according to quality and safety requirements. 6. Computer literate with basic knowledge of Microsoft Office applications (Word, Excel, Outlook). Knowledge of AutoCAD or project monitoring tools is an added advantage.	Johor Bahru
