

Delete Invalid Email Addresses from Autocomplete - MDaemon Webmail (WorldClient)

To remove auto-saved Autocomplete email address suggestions from the To field in in MDaemon Webmail (WorldClient), please follow these steps:

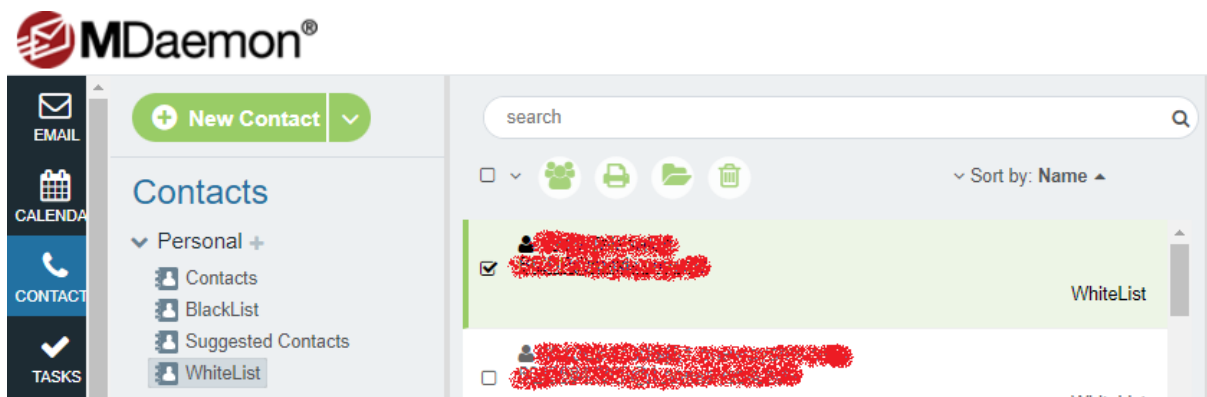

- 1 Open Contacts folders on your browser.

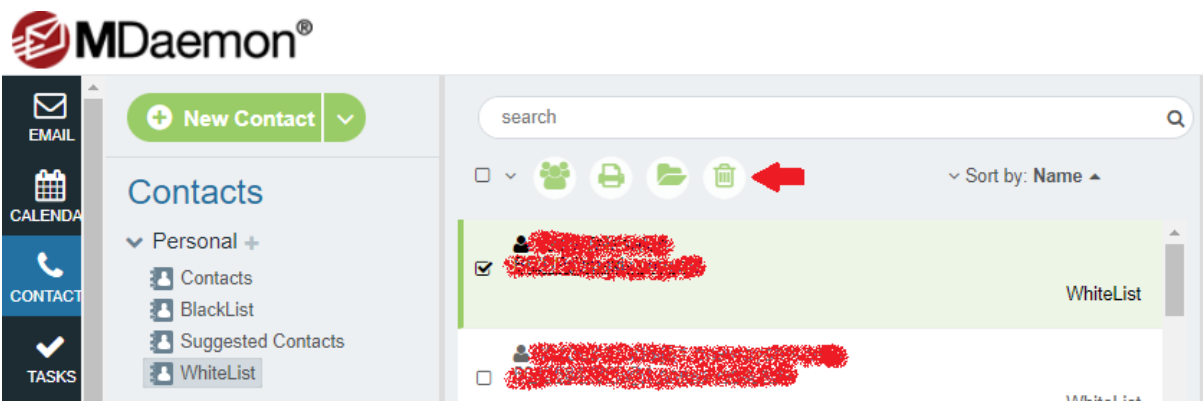

- 2 Find out the contact or email address you want to delete on any other personal contacts folder where the address might be stored.

- 3 Hover your mouse over the contact and click on the checkbox icon.

4 Select the Delete icon.

5 Click on the OK button to confirm.
